

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-23785

Stream : West Fork White River

Applicant : Veolia Water Indianapolis, LLC
Dominique Halloran
1220 Waterway Boulevard
Indianapolis, IN 46202-2157

Description : A new ground water treatment facility will be constructed landward of the floodway along the West Fork White River. Floodway construction activities include a 24" water supply line from the new well field area, a 8" surface water residual force main, a new surface water residuals pump station, a new well water to surface water treatment plant control structure, a 24" pipe to existing sedimentation lagoons, an addition to an existing access road, and modifications to the piping at the existing lagoon effluent flow monitoring structures, a 20'-6" by 7'-6" addition will be constructed 3' above grade on an existing flow split structure. In addition, a 37.5' x 43' x 46' aeration/detention structure will be constructed with the top at elevation at 782.0'. Also, an approximate 128' x 320' thickening basin will be constructed with a small portion of the basin being in the floodway. Details of the project are contained in plans and information received at the Division of Water on April 11, 2006, April 27, 2006, May 19, 2006, May 22, 2006, June 1, 2006 and July 10, 2006.

Location : At the existing White River North Surface Water Treatment Facility located between River Avenue, East 122nd Street and the West Fork White River
DOWNSTREAM: near Carmel, Clay Township, Hamilton County
S½, SE¼, Section 34, T 18N, R 4E, Fishers Quadrangle

30 Day Public Notice Report

Application # : FW-23883

Stream : Ohio River

Applicant : AK Steel - Rockport
Dave Miracle
6500 North US Highway 231
Rockport, IN 47635-9061

Description : An existing outfall structure will be removed and an existing 36' diameter effluent discharge pipe will be extended from the right (north) streambanks, approximately 165', to the streambed. The pipe will be placed by the trench method. The pipe will have 2.5' of cover between its encasement and the streambed. Details of the project are contained in information and plans received at the Division of Water on June 19, 2006 and June 30, 2006.

Location : Along the right (north) overbank, approximately 6200' downstream of the Honey Creek confluence
near Rockport, Ohio Township, Spencer County
SE¼, NW¼, SW¼, Section 13, T 7S, R 6W, Rockport, IN-KY Quadrangle

30 Day Public Notice Report

Application # : FW-23884

Stream : Cow Run

Applicant : Temple & Temple
Tom Jones
1367 South State Road 60
Salem, IN 47167

Description : An earthen dam will be constructed across the stream valley to create a 22-acre lake. The surface area of the lake will have a normal pool elevation of 556.0', NGVD and a depth of 28'. Approximately 68,000 cubic yards of soil will be excavated from the lake to be used as fill for the proposed dam. It will be a maximum height of 37' high, 10' top width with an elevation of 560.0', NGVD. The embankment slopes will be 2.2:1 and 3.75:1. A core trench with a 5' bottom width will be excavated. The trench will be backfilled with on-site selected soil, compacted and will have 1.5:1 sideslopes. The principle and emergency spillway will be 35' wide with 4:1 sideslopes. Details of the project are contained in information and plans received at the Division of Water on June 19, 2006.

Location : Approximately 1,200' linear feet upstream of the confluence of Guernsey Creek near Henryville, Monroe Township, Clark County
Clark Military Grant #268, Henryville Quadrangle
Quad Code: 3808557
UTM Coordinates: Downstream 4265470 North, 605770 East

30 Day Public Notice Report

Application # : FW-23885

Stream : Mississinewa River

Applicant : *Indiana Department of Transportation
Richard Phillabaum
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2216

Description : The existing bridge carrying State Road 1 over the Mississinewa River will receive a new concrete deck, railing approach slabs and guardrail. The repairs to the substructure concrete and riprap will be placed around the interior piers to protect against scour. Details of the project are contained in information and plans received at the Division of Water on June 21, 2006.

Location : SR 1 over the Mississinewa River is 0.8 miles south of SR 28 near Fairview near Fairview, Green Township, Randolph County
SE¼, Section 11, T 21N, R 12E, Redkey Quadrangle
Quad Code: 4008532
UTM Coordinates: Downstream 4460625 North, 657415 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Application # : FW-23886

Stream : Muddy Fork

Applicant : Clark-Floyd Waste Services
Robert Lee
PO Box 2128
Clarksville, IN 47129-2128

Description : An approximate 1400' x 1250' area will be excavated to a depth of 20' below existing grade. There will be a 75' buffer area between the excavation area and bank of Muddy Fork. All excavated material will be removed from the floodway. Details of the project are contained in information and plans received at the Division of Water on June 21, 2006.

Location : Along the left (northeast) overbank, extending approximately 850' to 2100' north of the Wilson Switch Road stream crossing and 200' to 1550' west of Wilson Switch Road
near Wilson, Carr Township, Clark County
Clark Military Grant #3, Speed Quadrangle

30 Day Public Notice Report

Application # : FW-23889

Stream : South Hogan Creek

Applicant : Texas Gas Transmission
Sam Patterson
PO Box 20008
Owensboro, KY 42304-0008

Description : Approximately 27' of an existing pipeline will be stabilized with revetment mats, placed over a geotextile fabric. Also, 40' of the creek's eroded south (left) streambank will be stabilized with concrete revetment mats to protect the bank from further erosion. The revetment mats will be keyed into the streambed at its base and will conform to the existing bank at the project limits. Details of the project are contained in information and plans received at the Division of Water on June 21, 2006.

Location : Approximately 2244' east of the Stitts Hill Road and Chesterville Road intersection (along Chesterville Road) and 900' south of Chesterville Road near Moores Hill, Hogan Township, Dearborn County

30 Day Public Notice Report

Application # : FW-23891

Stream : Unnamed Tributary Middle
Fork Wildcat Creek

Applicant : Mark E Remaly
90 West 550 South
Cutler, IN 46920-9308

Description : Approximately 130' the stream's eroded west bank will be restored to a 2:1 slope and protected with both revetment riprap over a geotextile fabric and bio-engineered methods. The riprap will have a maximum height of 1.5' and a depth of 6". The bio-engineered methods will include dormant stock plantings, consisting of native woody plants, planted 1.5' apart. Construction will also include the replacement of the outlet of an existing outfall structure. The 20' long outlet to the outfall structure will consist of PVC pipe and will be equipped with an animal guard. Details of the project are contained in information and plans received at the Division of Water on June 22, 2006.

Location : Approximately 80' south and 85' west of the County Road 550 and State Road 75 intersection
DOWNSTREAM: near Cutler, Democrat Township, Carroll County

Application # : FW-23892

Stream : Jakes Creek

Applicant : The Muncie Sanitary District
Michael Rost
300 North High Street
Muncie, IN 47305-1639

Description : A new 700 gallon per minute submersible wastewater lift station will be constructed to serve approximately 265 existing residential homes in the Farmington Addition located landward of the floodway. Wastewater will be pumped into the existing 18" Sanitary District sewer which runs parallel to the creek. The lift station will be a 10' diameter concrete structure extending 20' into the ground with 4' extending above ground. A 2' x 3' pump control box will be located next to the station extending approximately 5' above grade. The Sanitary District will construct a gravel access road at grade from Fox Run Lane to the lift station for vehicle access for operation and maintenance. Details of the project are contained in information and plans received at the Division of Water on June 22, 2006.

Location : Along the south (left) stream bank, approximately 1,100' linear feet from the County Road 200 West stream crossing
near Muncie, Hamilton Township, Delaware County
SE¼, SE¼, Section 30, T 21N, R 10E, Muncie West Quadrangle

30 Day Public Notice Report

Application # : FW-23893

Stream : Mill Creek

Applicant : Equicor Real Estate Development
Brit Dykstra
9011 North Meridian Street
Suite 202
Indianapolis, IN 46280-5301

Description : Three outfall structures will be constructed along the banks of Mill Creek to discharge stormwater from a residential development located landward of the floodway. The pipe have diameters of 12", 15", and 21" respectively and will vary in length. Each pipe will terminate with a concrete end section. Riprap will be placed at the base of the end section to dissipate water energy as it approaches the creek. Riprap will also be placed on the opposite bank of the outfall to prevent erosion. Details of the project are contained in information and plans received at the Division of Water on June 23, 2006.

Location : Along the south bank of Mill Creek approximately 600', 1400', and 2400' upstream of Mill Creek Road
DOWNSTREAM: near Noblesville, Noblesville Township, Hamilton County

Application # : FW-23898

Stream : Little Lick Creek

Applicant : Indiana Department of Transportation
Rick Phillbaum
100 North Senate Avenue
Indianapolis, IN 46204-2273

Description : The existing one-span concrete box beam bridge carrying State Road 26 over the creek will be replaced with a three-span spill-through bridge. Approximately 15' of the channel will be relocated to the east side of the existing channel. It will be 5' deep, with an 24' bottom width and 2:1 sideslopes. The realigned channel will be excavated "in the dry" and will not be connected to the existing channel until the excavation has been stabilized with riprap. Material excavated from the construction of the new channel will be stockpiled for later use as fill for the old channel. Additional fill material will be brought onsite from an outside source if needed. Details of the project are contained in information and plans received at the Division of Water on July 3, 2006.

Location : At the State Road 26 crossing

Application # : FW-23899

Stream : St. Joseph River

Applicant : City of Fort Wayne
Matthew Wirtz P E
One Main Street Room 480
Fort Wayne, IN 46802-1823

Description : Approximately 300' of an unnamed tributary to the St. Joseph River will be dredged 2' to 4' to restore the channel to its original depth in order to reactivate an existing raw water pump station that pumps to the Hurshtown Reservoir, a source of raw water for the City of Fort Wayne. Dredging will be performed by backhoe or other excavation equipment. Excavated material will be transported upland to a disposal site out of the floodway and provisions to capture sediment will be in place to prevent the sediment from reentering the channel. Details of the project are contained in information and plans received at the Division of Water on July 5, 2006.

Location : Immediately west of Roth Road and North of the Hurshtown Reservoir south of the St. Joseph River approximately 1 1/2 miles north of Grabill.
near Fort Wayne, Cedar Creek Township, Allen County

Stream : Driftwood River

Applicant : Civil Designs, LLP
David M Griffiee, PE
2415 Directors Row, Suite E
Indianapolis, IN 46241-4934

Description : A commercial facility will be developed southwest of Driftwood Drive to provide space for a retail drug store. The facility will consist of a 114' by 130' masonry building, drive-thru area, dry detention basin and asphalt parking area constructed on compacted fill placed along the southwest bank. The fill will cover an approximately 400' by 350' area and will vary in depth from 1' at the landward edge to 8' near the stream. It will be set back 200' from the top of the streambank and will have a finished elevation of 624', NGVD. The fill will have 3:1 sideslopes from the finished grade down to the existing floodplain elevations. The parking area will be constructed finished elevation of the fill. The lowest floor elevation of the building will be 626', NGVD. Details of the project are contained in information received electronically at the Division of Water on July 10, 2006.

Location : Project is located a part in the southwest quarter of section 23 and a part in the northwest quarter of section 26. Project is also located at the northeast corner of S.R. 46 and Carrhill road, southwest of Driftwood River. The site is currently vacant.

Application # : FW-23904

Stream : St. Joseph River

Applicant : John L Lucchese
2806 E. Jackson Blvd.
Elkhart, IN 46516

Description : An existing, concrete seawall will be replaced with a new steel sheet piling seawall along 65' of the south (left) bank of the St. Joseph River to deter bank erosion. The new wall will be approximately 5.5' high, as measured from the riverbed, will have the same alignment as the existing wall, and will tie into existing seawalls located on adjacent properties located to the east and the west. The piling will be driven approximately 7' into the riverbed and will be anchored with deadmen spaced at 12' intervals. A rear facing whaler will be placed across the inside of the wall to further stabilize the structure. Clean fill will be brought onsite to backfill the area landward of the new seawall. The fill will be leveled with the top of the wall at the river and will be tapered back to existing ground elevations within the project site. Details of the project are contained in information received electronically at the Division of Water on July 10, 2006.

Location : along the left (south) riverbank, approximately 1200' downstream from the confluence of Pine Creek

near Elkhart, Concord Township, Elkhart County
